Course Goals

Learning objectives

- Collaboratively define the requirements for a prediction task
- Design and implement a matching prediction mechanism for the task
- Operate the mechanism as a service as part of a prediction competition [1]

[1] Your grade does not depend on the competition results

Skills Required for Course

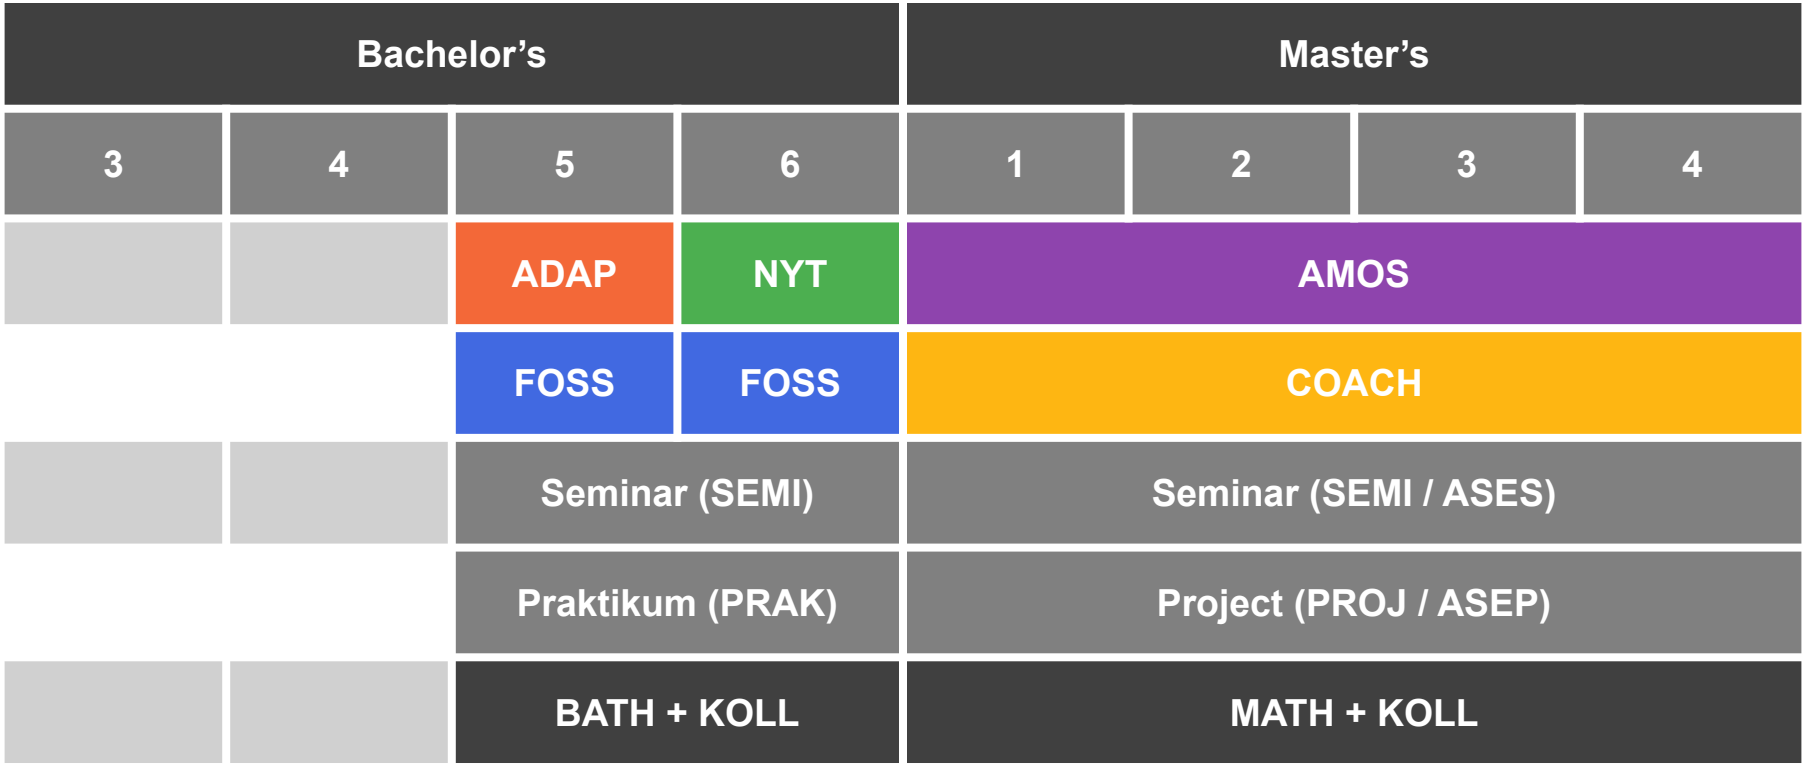

Prerequisites

- At least one machine-learning technique

Required skills

- Ability to read open source code
- Ability to operate open-source software
- Proficiency with tools and command line

Course Position in Curriculum

Project Grading

Submitted homework (50%)

- Value of homework
  - Completeness
  - Quality of work
- Weighed equally

Predictions made (50%)

- Value of round
  - Distance to correct result
- Weighed by round
  - First round = 1/36
  - Second round = 2/36
  - Third round = 3/36
  - Fourth round = 4/36
  - Fifth round = 5/36
  - Sixth round = 6/36
  - Seventh round = 7/36
  - Eighth round = 8/36

Class Participation

Participation in the first class is mandatory to get in

Classes 2 to 5 and the last class are mandatory

- They are exams for the submitted homework

Use of AIs in Class and for Homework

The use of AIs to support your work is generally allowed

You remain responsible for the results of your work

Use of an AI has to be declared together with the work

Responsibility for Internet Connection

If this is an online course, you are responsible for your internet connection

- If I ask you a question, you need to be able to answer

No Oral or Written Exam [1] [2]

[1] If both you and we don’t want to
[2] You still have to register for the course

Three Steps to Proper Registration

Course Organization

See https://pcom.uni1.de

Course Communication

Announcements by email

- Through course management system

Questions to teaching team

- Please ask your question in the course forum
- For private questions, use the teaching team email alias

Non-urgent questions will be answered in class

- PCOM class worklog
